

8.3.1 Commercial Water Use by Source (Billion Gallons per Day)

<u>Year</u>	<u>Total Commercial Water Use</u>	<u>From Public Supply</u>	<u>Self-supplied</u>
1980	-	-	-
1985	6.94	5.71	1.23
1990	8.29	5.90	2.39
1995	9.58	6.69	2.89
2000 (1)	10.31	7.20	3.11

Note(s): 1) USGS did not provide commercial splits in 2000 data. 2000 figures were estimated using percentage splits of public and self-supply from 1995 and applying them to the revised 2000 estimates of total use. Self-supply water use: Water withdrawn from a groundwater or surface-water source by a user rather than being obtained from a public supply. Public supply water use: water withdrawn by public and private water suppliers that furnish water to at least 25 people or have a minimum of 15 connections.
